

Monroe County Fire Chief James Callahan spoke to members during the annual member meeting this February. He stated that new fire hydrants being installed throughout the island as part of the sewer project could affect your fire insurance rates in a positive way. Chief Callahan has provided us with a list of the 31 fire hydrants that have been installed to date on Duck Key with their locations. These hydrants are in service as of April 10, 2013. Be sure to let your insurance agent know that this change has occurred. Hopefully you can save some money on your next insurance premium. Thanks to Chief Callahan for providing us with this helpful information.
